. N. Roos Named Chairman Of Police And New Orleans Prison Advisory Boards

Jimmy N. Roos, vice-president! and general manager of an electrical supply company in New

Orleans, was elected chairman of

Roos, who owns a sumer home in Clermont, succeeds Richard R. Foster, chairman for six years and head of the Mayors Vieux Carre Vice Committee.

The election was held after Fos-

ter asked that he be allowed to step down for business reasons. Roos was appointed to a four year term on the board last July 20. He represents the Police Advisory Board as a member of the Mayor's Advisory Committee. Roos was also named chairman

of the newly-created prison advisory board, by Mayor Morrison. Wednesday, July 18.

Others on the board are the Rev. Fred Digby, Charles F. Durr, Mrs. Milton Alder and Louis S.

The prison advisory board was appointed by the Mayor, Roos stated, on the reccommendation of Commissioner Victor H. Schiro, to study conditions in the Louisiana House of Detention with a view to recommending to Schiro, ways, and means of improving these conditions- both from the standpoint of the citizens and the prisoners themselves.

the book, "Missions in the Bi.

Roy Brenner of New Orleans. | Mispionary Call and Covenant,

Discussed by W. M. S.

The Womans Missionary Society, Circle I, met on Tuesday of this week at the home of Mrs.

The program consisted of the study of chapters II and III of ble" by J. B. Lawrence, which is being taught by Mrs. Robert L.

The lesson dealt with The First Gospel Promise, The Testimony of Jehovah, God's Sov-

The Missionary People of The Missionary Religion.

Mrs. Moore served an iced course to the members and visitors who were Mrs. Wall, Mrs. Thompson, Mrs. W. W. Pahlman and Mrs. W. A. LeBlanc of Flo.

St. Henry's Plans A Church Fair

A church fair, for the benefit of St. Henry's church, will be held Sunday, August 12. on the

property. All donations for this occasion will be appreciated.

Cue And Gex, Inc. Get Contract in Decatur

Cue and Gex Construction, Inc. has been awarded a contract by the Mayor and Board of Alder_ men of Decatur, Miss., to gravel, prepare base and blacktop 19 streets in the City of Decatur. Work will begin within 10 days. Mr. and Mrs. J. R. Rollins journeyed to Decatur where Mr Proceeds will be used for im- Rollins, an engineer, attended provements of the church and the letting of the contract.

Experiened --- Capable --- Progressive

In this issue of the Echo there is published, according to law, a synopsis of the County audit made by the State Accounting Depart_ ment, for the fiscal year ending September 30, 1950. Under the law the complete audit is not published, but only a condensed statement prepared by the accounting department which gives total of revenues and their source, the total expenditures and purposes and the total assets and liabilities of the county.

The audit shows cash on hand as of September 30, 1950 the sum of \$269,227.73, divided as follows: General Funds, \$25, 294.00; Road and Bridge Funds \$45,137.14; School Funds \$40,665.16; Bond Funds \$157,_ 130.70 and Trust Funds .01.

The Board of Supervisors of the County have absolute control of the expenditures of the General County Funds and of the Road and Bridge Funds of the County, which includes the Sea Wall Funds.

The expenditures of the General County Funds are for salaries and allowances to the County Officers, courts, health units, paupers and many other statutory allowances.

The Road and Bridge Funds and the Seawall funds are strictly discretionary with the member of the Board of Supervisor of this beat. In fact the road funds are divided equally between the five beats and the total funds allocated to Beat 5 last year amounted to \$26,555.44 and the expenditures amount to \$30,851.72, (This amount does not include the expenditures on the seawall) AND AT THE END OF THE FISCAL YEAR OF 1950, THE ROAD AND BRIDGE FUND OF BEAT 5 SHOWED AN OVER DRAFT OF \$4413.88. FROM THE FIGURES AND FROM THAT SOURCE ALONE, CAN THE FACTS BE ASCERTAINED, SO THE COUNTY IN SO FAR AS BEAT 5 IS CONCERNED WAS NOT ON A CASH BASIS AT THE END OF THE FISCAL YEAR.

If you will look under!"Ending Fund bal_ ances" in the audit you will see where sub stantial balances appear in other beat funds of the county, certainly these beats were on a cash basis then and are now. The same cannot be said for Beat 5.

On July 2nd. 1951, the Chancery Clerk, according to the 1950 budget law, notified the Board of Supervisors that the Supervisor of Beat 5 had exceeded his budget in both the Road and Bridge Fund and the Sea Wall Fund, and that the Funds for Road and Bridge Maintenance purposes were depleted, and the minutes of the Board show that an order was adopted declaring an emergency for the Sea Wall fund, in order to allow an additional expenditure of \$4000.00. So it is quite apparent that the County is not on a cash basis insofar as Beat 5 is concerned.

The School Funds of the County show a balance of \$40,665.16. These funds are not expended or controlled by the Board of Sup ervisors, but are handled and expended under the direction of the Superintendent of Edu cation and the School Trustees.

The income to the County from Gasoline Taxes, Truck and Bus and Automobile privilege licenses has gown to tremendous proportions in the last Our years. From 1928 to 1946, (19 years) the total receipts from these sources amounted to \$1,533,613.64, and the receipts from these some sources for the past four years from 12.7 to 1950 amounted to \$726,941.54.

The receipts from this source by years

tollows:			
1928	\$75,449.80	1940	90,103.61
1929	80,951.68	1941	95,816.96
1930	68,811.92	1942	98,598.29
1931	60,209.93	1943	80,286.73
1932	54,641.57	1944	83,543.05
1933	53,252.46	1945	96,792.71
1934	56,928.98	1946	145,055.68
1935	61,873.87	1947	170,062.54
1936	69,720.00	1948	174,491.01
1937	82,421.73	1949	179,055.40
1938	88,875.03	1950	203,332.59
1939	90,278.99	2000	200,002.00

The receipts for 1951 will be even larger than that of last year.

These funds are distributed to the Road Protection Bond Fund for the payment of the seawall bonds and the interest hereon; to the Road and Bridge Bond Funds for the payment of the Road and Bridge Bonds and the interest thereon, and to the Road and Bridge Funds, each of the Supervisors Districts having received \$10,8333.03 from this source last year.

Prior to 1946, the amount received from this source was not sufficient to meet the principal and interest payments of the bonds. In addition to the allocation of Road, and Bridge Funds during the past year a special allocation of approximately \$12,000.00 was made to the Supervisor of Beat 5 for repair

and maintenance of the Sea Wall.

In addition to the Gasoline Tax, truck and bus and automobile privilege licenses, the county received from the State of Mississippi a refund of \$75,000.00 as payment for the roads and bridges built by the County on the primary highway system. This money and any of the bond funds cannot be used for any purpose other than the payment of bonds and interest, and it is now a part of the balance to the credit of the sinking funds.

From these figures it can be seen why there should be a real substantial balance in the County Depository, far in excess of the balance as of September 30, 1947, which then totaled \$111,342.44.

The influx of money from these sources, together with an increase in the total assess. ments of the County gives us a total receipt of funds for the past year amounting to \$687,696.03 as compared to \$513,579.98 for the year 1947; but with all of these funds and with the cash balances in the various funds, the Road and Bridge Funds of Beat 5 were overdrawn \$4413.88 as of September 30, 1950, and are depleted at this time for this fiscal year with 3 months of the year yet to

And what have we received for the money spent on our roads and on the Sea Wall? We still have the old dirt roads of bygone days, with the exception of Waveland Ave. nue, Nicholson Avenue and Kiln Road, which were surfaced with W. P. A. Funds, and the Lakeshore road which was surfaced by the State Highway Department.

As to the Seawall and Beach Road, we will let you judge for yourself as to what has been done.

I earnestly solicit your support and in_ fluence and I assure you, if elected your sup ervisor that I will render you a progressive, competent and faithful administration, ever endeavoring to carry my program to a definite conclusion.

pounds of either 3 percent gamma benzene hexachloride - 5 percent DDT; 2½ percent aldrin - 5 percent DDT; 11/2 percent dieldrin -5 percent DDT; or 20 percent toxaphene to the acre. In spraying, use ½ pound DDT or 2 pounds of technical toxaphene to the acre. In heavy infestations increase the dosage to 15 to 20 pounds of recommended mixtures to the acre or use 10 pounds of 3 percent gamma benzene hexachloride - 10 cent. percent DDT to the acre. In spray apply 34 to 1 pound of technical

FARMERS PROSPER WHEN PRICES ARE STABILIZED

Price stabilization protects profitable markets for agricultural products because the farmers marpower the public has, Office of trolling inflation. What is one Price Stabilization officials stated man's price is certainly another

"If inflation is permitted to undermine the buying power of the benefits of stable prices. All citipublic, farmers will sell less and zens have a duty to accept equal make smaller profits on farm op- shares of the restraints and the erations", OPS officials said. It temporary sacrifices that are necwas pointed out that the prosperity of farmers depends a great deal on how successfully the national price stabilization program protects the buying power of all to, pepper and cabbage plants have citizens. "When inflation forces been exempted from price control prices up, most people have to buy less of everything. When fewer goods can be bought, production must be cut and fewer people have jobs. As a result, farmers sell less and soon have to sell at lower

"There is a limit to what the American housewife can and will pay for items in the family budget. Farm products must be made available to the workers in the cities and factories at prices they can afford to pay. The reluctance of many housewives to buy beef today is an indication that beef ... and Mrs. Lester Seal and is approaching the point where it

recommended poisoning program, economic blow. And history shows using quick killing insecticides that when prices decline generally such as aldrin or the "3-5" mix- farm prices drop faster than

Steadliy rising defense production will require large supplies of chemicals, metals and building materials during the coming year. Without controls, the prices of ful operation of a farm would

OPS officials explained that controls authorized under provisions of the Defense Production buys. The following figures indicate the price trend on some items: Retail price increases from start of Korean War to February 1951

OPS Price freeze effective date: Farm machinery up 8.5 percent. Building materials up 11.9 per-

Fertilizer up 4.4 percent. Food up 11.3 percent. Clothing up 9.4 percent. House Furnishings up 13.5 per-

Increase between February and June 1951: Farm machinery no increase. Buliding materials down 9.1 per-

Fertilizer down 1.3 percent Food up 0.6 percent. Clothing up 1.0 percent. House Furnishings up 1.4 per-

OPS officials and price stabilization protects the value of farmers savings. "Inflation undermines that value. No farm product has a ceiling lower than 100 percent of parity while the ceiling prices of many products are above parity. Inflation can be controlled. Every person in every occupation and

He doesn't stand alone...

Fast, Accurate Telephone Service is Vital to Civil Defense

Warnings of approaching planes, coming from air raid spotters or military radar screens, are flashed over networks of Long Distance and local telephone lines to Filter Centers.

Telephone reports are quickly charted on Filter Center Maps. Then Air Force interceptor planes are alerted. Rescue and relief work, too, are directed by telephone. This is but one type of the many special telephone networks serving government and military forces to help protect our Nation.

This great and growing telephone system was built to serve America in peace. But it is just as ready to serve in any emergency. The value of this nationwide telephone network was never greater—never clearer—than it is today.

TO HELP SPEED YOUR LONG DISTANCE CALL

please give the operator the out-of-town telephone number. Telephone lines are busy with national defense.

GULF* CHEVROLET Phone 424 102 South Beach

What it Takes to Drill a Well

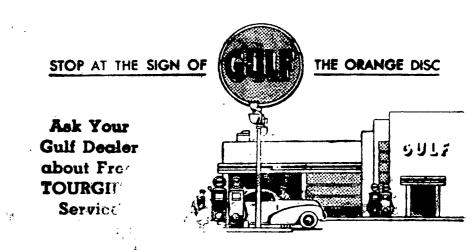

Here's a partial bill of materials and equipment required to drill a typical Mississippi oil well:

One rotary rig, 7,000 feet of drill pipe, 20 drilling bits, 22,500 gallons of butane, 15,000 barrels of water, 1,500 sacks of drilling mud, 8,600 feet of easing, 1,250 sacks of cement, 15 to 20 trucks, 7,000 feet of tubing, 500 feet of 14" Manila rope, 1,250 feet of drilling cable, and the labor of more than a hundred skilled men and wom ".

That's part of the total of materials and services which Gulf- puts into every drilling operation. A bill for \$50,000 to \$200,000 due and payable whether the well is a producer or one of the 126 dry holes which Gulf has drilled in Mississippi.

But the most important material hasn't been listed. It's the one thing essential to every operationfaith in Mississippi and its people. Without faith, no location is ever staked, no well ever rigged. You might choose one of a dozen different tools to do the job. Or if you had to you could do without some of the materials which ease the work of the bit in the hard core of the earth. But you wouldn't drill the first foot without a full supply of faith

Gulf has that faith and confidence in Mississippi. In 34 years of pioneering for oil and gas in the state its expenditures still are \$17,500,000 ahead of income. Its investment in Mississippi is \$75,000,000 -representing the faith and confidence which Gulf shares with every farsighted Mississippian in the future and prosperity of the state and its citizens
